English

OBJECTIVE

Final-year Information Technology student majoring in Software Engineering, with an interest in data analysis and marketing analytics. Possess basic knowledge of SQL and data processing, along with strong logical thinking.

Eager to gain hands-on experience in data analysis, understand user behavior, and support data-driven decision-making, with the goal of becoming a Business/Data Analyst.

TECHNOLOGIES

Programming Java, C#, Python (basic)

Database MySQL, MongoDB

Tools Git, Docker (basic)

Others Firebase, REST API

Environment XAMPP, Laragon

Operating Systems Windows, Ubuntu (Linux)

PROJECTS

BOOKACUT – Booking Application **Sep 2025 - Dec 2025**

Fullstack Developer

Github: github.com/chautdat/BookaCut

- Developed user and admin interfaces
- Used Firebase as the database for storing and managing data
- Processed user data (registration, login, booking)
- Supported data validation during system development
- Collaborated with team members to complete features

PDQ RESTAURANT **Aug 2025 - Jan 2026**

Fullstack Developer

Github: github.com/chautdat/pdq-restaurant

- Designed and managed database using MySQL (Laragon)
- Built backend using Spring Boot for system logic and data processing
- Developed user interface using Vue.js
- Processed order and user data
- Observed user behavior and suggested improvements

DQP CINEMA – Movie Booking System **Apr 2024 - Jul 2024**

Frontend & Data Support

Github: github.com/chautdat/MovieTicketBooking

- Processed data from APIs for display
- Built UI using Angular
- Designed basic booking interface
- Worked with database (MySQL – XAMPP)
- Tested and fixed data display issues
